SUMMARY

Final-year Software Engineering student at Sunway University with hands-on production experience designing UI/UX for live Malaysian government portals. Built and deployed AI-integrated applications independently. Microsoft AI certified. Dean's List. Targeting AI-adjacent product or engineering roles in KL, Penang, Singapore.

EDUCATION

Sunway University Bandar Sunway, Selangor, Malaysia
BSE — Bachelor of Software Engineering (Hons), AI Engineering / Software Engineering Sept 2023 – Sep 2026
CGPA: 3.3/4.0 · Graduation Ceremony: February 2027

Studied under both Sunway and Lancaster University education frameworks

- Dean's List Award Feb 2025 — Semester GPA 3.67, ranked among top students in programme
- Student Ambassador 2024 — Volunteered in Sunway International School to help and teach students
- Student Ambassador 2025 — Helped introduce campus grounds to newcomers of Sunway University

Sunway College Selangor, Malaysia
OSSD/CIMP — Canadian International Matriculation Programme · Graduated with Honours July 2022 – July 2023

SMK Saint George, Taiping — High School Taiping, 34000 Perak
SPM — Graduated with Honours Graduated 18 Oct 2019

- Participated in State and National Drama competition, securing top 10 position
- Participated in multiple extra-curricular activities

EXPERIENCE

Century Software (Malaysia) Sdn Bhd Petaling Jaya, Selangor
Software Engineer (Intern) 17 Jan 2026 – 30 April 2026

- Worked on front-end Flutter code, converting Figma designs to Flutter
- Analysed production back-end architecture and database schemas for two live government portals to support front-end integration decisions
- Delivered UI/UX designs for both mobile and web portals using Figma for two entire government projects, single-handedly

UI/UX Designer

- Designed end-to-end UI/UX flows in Figma for BayarNow, a live government bill payment portal serving public users across Malaysia
- Delivered the Pay Direct guest payment feature — a 5-screen flow enabling unauthenticated bill payments, from requirements through to final prototype
- Contributed to OSC (One Stop Centre), a government business licensing portal, designing multi-role user flows and screen layouts
- Collaborated with a senior product supervisor, with structured stakeholder feedback in an Agile-aligned workflow

Freelance — Website Developer

Remote · Nov 2025 – Feb 2026

- Co-developed the official Malaysian website for Fireball (<https://fireball.my/>) with another friend for a personal client — a premium Korean automotive accessories and detailing equipment brand, in collaboration with a university peer
- Designed the platform by referencing the client's established international websites to maintain global brand consistency and structural integrity
- Engineered a streamlined e-commerce infrastructure that directly integrates with the client's official Shopee account to securely and efficiently manage payment processing

Microsoft Azure — AI Bootcamp Participant Remote, Microsoft Certified
Microsoft AI Train Bootcamp — AI-102 & AI-900 April 2025 – Aug 2025

- Completed AI Fundamentals certification (AI-102) and participated in AI programming workshops (AI-900) focusing on AI agents and chatbot development
- Attended structured classes and examinations over 4 months covering practical AI programming concepts

Student Ambassador · Sunway University

- Led campus tours for prospective students and represented the university at orientation events

Educational Volunteer · Children's Home

- Organised and delivered educational and recreational activities for children as part of a student volunteer group

PROJECTS

Capstone Project II — Final Year Software Engineering Project

2025 – 2026

Sunway University · Individual Project

- Full-cycle software project spanning requirements, architecture, implementation, and testing across two semesters using Agile methodology and structured design patterns
- An AI system that lives in a program inside the computer with the ability to control and access computer settings and applications to help the elderly use their laptops with ease and by just talking to one program that handles all tasks

Local AI Assistant — Multi-Provider LLM Integration

2025

Personal Project · Python

- Built with a multi-provider fallback pattern across Groq, OpenRouter, and Gemini APIs — provider-switching architecture ensures zero-downtime responses under API rate limits
- Currently working but still under development for better usability and fewer bugs
- Voice-activated AI assistant built on Gemini 2.5 Flash with tool-calling capabilities, multi-provider API fallback architecture, and natural language computer control

ManageIT — Inventory Management App

2024 – 2025

University Course Project · Python, SQL

- Inventory tracking application with full CRUD operations and basic reporting functionality built in Python and SQL

FireBall.my · Portfolio Website for Client

2025 – 2026

Personal Project (Freelancer) · HTML, CSS, JavaScript, Antigravity, Node.js

- Co-developed FireBall.my from scratch with a classmate handling full-stack responsibilities
- Separately built a personal portfolio site for project and contact showcasing
- Connected the website with links to the online shop in Shopee

TECHNICAL SKILLS

Coding Languages: Python · Java · JavaScript · SQL · HTML · CSS · Node.js

Design & Tools: Figma · Canva · Microsoft Tools · GitHub · Kiro AI · ChatGPT · Gemini · Obsidian · Firebase · Docker · AWS · Flutter · REST API Integration · Use of Multiple APIs · OpenCV

Concepts & Practices: UI/UX Design · RESTful APIs · OOP (Object-Oriented Programming) · System Design · CI/CD · Unit Testing · Agile

AWARDS & CERTIFICATIONS

Dean's List — Sunway University (Feb – Apr 2025)

Microsoft Certified: AI Fundamentals (AI-900)

English Drama — State Competition Winner

English Drama — District Competition Winner

National English Language Drama Competitor

Chinese Calligraphy Competitor

LANGUAGES

English (Fluent) Proficient · Erican Language Centre; Essay Competition winner **Tamil** (Fluent) Native **Bahasa Melayu** (Fluent) SPM **Chinese** (Basic only) Learning to be conversational · Chinese Calligraphy Competitor

OTHER SKILLS

Creative · Fast-Thinking · Critical Thinking · Team Leadership · Student Ambassador · Adaptability · Time Management · Working Under Pressure · Multitasking · Resilience · Client-Facing Communication · Logical Reasoning · Attention to Detail · Data Flow Documentation · System Architecture Planning
